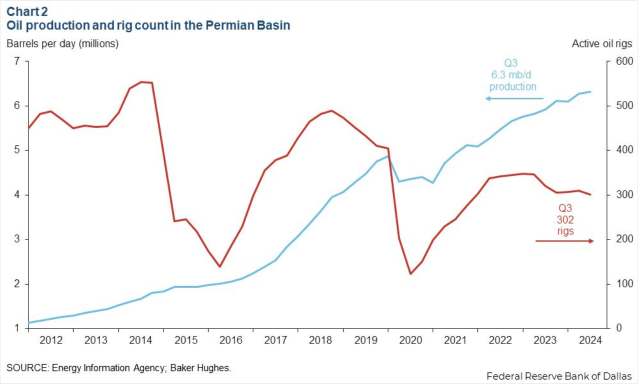
Location Overview:
Permian Basin

The Permian Basin spans approximately 250 miles wide and 300 miles long across western Texas and southeastern New Mexico. It's the most prolific oil-producing region in the U.S., contributing nearly half of the nation's crude output. The basin comprises three primary sub-regions: the Midland Basin, Delaware Basin, and Central Basin Platform.



Oil production and rig count in the Permian Basin, 2012–2024.

Blue line = oil output (million barrels per day); Red line = active drilling rigs.

Production has hit record highs despite a lower rig count in recent years (source: dallasfed.org)

Industry Trends

Production Growth: As of early 2025, the Permian Basin's oil production has reached approximately **6.2 million barrels per day** (bpd), marking a 7.5% increase from the previous year (souce: YCharts)

Rig Count: The number of active drilling rigs in the basin stands at 291, a slight increase from earlier in the year but still down 4% compared to the same period last year (source: Midland Reporter-Telegram)

Investment Activity: Despite some market volatility, companies like U.S. Energy Development Corporation plan to invest up to $1 billion in Permian projects throughout 2025, indicating **sustained confidence** in the region's potential (source: Oil Gas Leads+1PR Newswire+1)
